

GFOA-PA Central Region

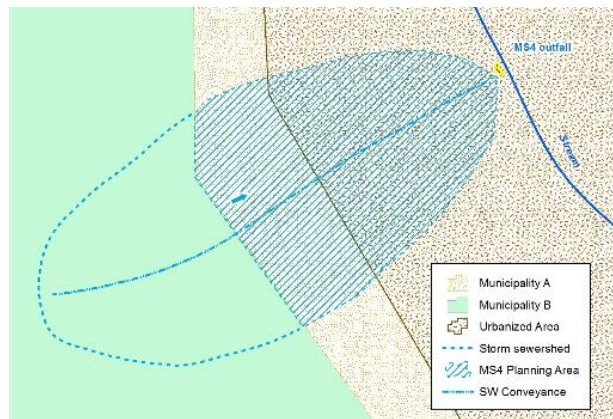

Pennsylvania Department of Environmental Protection's Municipal Separate Storm Sewer (MS4) Program

Municipalities and other entities such as universities and prisons that meet certain standards must obtain NPDES permit coverage for discharges of stormwater from their municipal separate storm sewer systems (MS4s). In Pennsylvania there are two Large MS4s, no Medium MS4s, and 953 Small MS4s. Small MS4s must apply for NPDES permit coverage or a waiver if they are located in an urbanized area as determined by the latest Decennial Census by the U.S. Census Bureau, or if they are designated as needing a permit by DEP. For the next permit term, MS4s that discharge to surface waters impaired for certain pollutants or that discharge to waters in the Chesapeake Bay watershed will need to develop Pollutant Reduction Plans or TMDL Plans.

Roundtable discussion topics will include.....

- Coordinating efforts across government and private agencies
- MS4 permitting
- York County's Regional Pollution Reduction Plan
- Feasibility of a County wide Stormwater Authority.

ROUNDTABLE BIOGRAPHIES

John Mizerak

Tetra Tech - Economic Development Program Manager

TETRA TECH

Tetra Tech is a leading provider of consulting, engineering, program management, construction management, and technical services. Tetra Tech has more than 16,000 employees in 400 offices worldwide – with seven offices across Pennsylvania including in Harrisburg. Tetra Tech supports government and commercial clients by providing innovative solutions to complex problems focused on water, environment, community planning, hazard mitigation, energy, infrastructure, and natural resources. Tetra Tech is consistently ranked at the top of Engineering News-Record’s annual rankings and has been ranked the #1 company in Water for the past 15 years. Tetra Tech is the national leader in providing stormwater management and green infrastructure solutions at the municipal, state, and local level. With more than 25 years of experience in stormwater, we understand the challenges faced by state and municipal governments – from flood mitigation to regulatory compliance for impaired waters and total maximum daily loads (TMDLs). Our nationally recognized staff of expert professionals is available to address your stormwater needs and facilitate stormwater program management.

Mr. Mizerak has worked for more than 22 years in both the public and private sectors, providing a wide variety of services related to strategic planning, development and public funding strategies. Currently he leads Tetra Tech’s Economic Development and Long-Term Recovery Planning Practice Areas. The focus of these services is to define goals and objectives, identify priority projects and initiatives, communicate with key stakeholders, defining the necessary steps for the project implementation, building public and private partnerships, and leveraging public funding for project financing. He formerly worked for PA DCED and managed the Land Use Planning and Technical Assistance Program and managed the State’s Interagency Team, State Planning Board and PA DEP’s State Water Plan.

John Seitz

York County Planning Commission - Water Resources Coordinator (WRC)

Mr. John Seitz began his career as the Water Resources Coordinator (WRC) for the York County Planning Commission (The Commission) in February of 2002. As the WRC John has gained a big picture of water related issues through his efforts as the Commission’s representative while attending many local, state, regional, and federal committees and meetings. He was lead project manager for the development of York County’s Integrated Water Resource Plan which acts as the County’s Act 167 Plan (Stormwater Management Plan) as well as the County’s Water Resources Component of the Comprehensive Plan. Currently, John is actively involved with York County’s Regional Pollution Reduction Plan, MS4 Permit, and a County Stormwater Authority Implementation Plan.

2 Hours of Continuing Education Credits
(Two credits for Business Management - Management planning in industry)

**Pennsylvania Department of Environmental Protection's
Municipal Separate Storm Sewer (MS4) Program**

Thursday June 14th, 2018

SEMINAR AGENDA

Registration: **Begins at 8:30 AM**
Program: 9:00 – 11:00 AM
**** BREAKFAST WILL BE PROVIDED ****
Fee: \$25 for members, \$35 for nonmembers (discount of \$10 if become a member), \$15 for students

If your governmental employer will not pay for your attendance, please contact Rick Grove at rgrove@latwp.org. A limited number of free admissions are available to those who qualify.

Location: Adams County Human Resources
525 Boyds School Road
Gettysburg, PA 17315
Phone: (717) 337-9822

Program level of difficulty: Overview

Recommendation of education and experience prerequisites: No recommended education or experience
